

## ***Here is what's new in our March 2019 Edition:***

### **Layperson's Guide:**

***Is It OK If I Leave Now?:*** Whether or not you are open about your hearing loss, there often comes a point at which you just can't try to listen anymore. Please CLICK on the following link: [Laypersons' Guide](#)

***Cochlear Implants – Bringing Back The Joy of Sound:*** This is an engaging and enlightening video presentation on the ground-breaking and life-changing impact of cochlear implants. Please CLICK on the following link: [Laypersons' Guide](#)

### **Guidance Articles:**

***Why Gen Z Loves Closed Captioning? Old Technology Finds A Surprising New Application!:*** A number of mental health experts support the notion that watching with closed captioning serves a valuable role for those who struggle with focus and listening.. Please CLICK on the following link: [Guidance Articles](#)

### **Current Research:**

***What If Your Reading Glasses Also Provided Captions?:*** This product is in its early stages, but it is exciting to see hearing loss taking center stage in this innovative and important technology project. Part of the reason is due to the project's leader, Christopher Caulfield, a second-year graduate student at Cornell Tech who is deaf. Please CLICK on the following link: [Current Research](#)

***Results From My Hearing Loss Survey:*** A few years ago, I started to wonder to what extent my personal experiences with hearing loss were similar to those of other folks. Eventually, the idea blossomed into my first-ever, semi-scientific survey. Please CLICK on the following link: [Current Research](#)

**How It All Works!: *Meet The Deaf Developer Behind Google's "Live Transcribe"***

**App:** Google's new "Live Transcribe" app may actually be the real-time speech-to-text transcription technology everybody with hearing loss has been waiting for. And if seeing is believing, Google's launch video may convince you that truly reliable real-time transcription for everyday use is finally here.
